

# Agoraphobia

Virtual environments to work on the fear of being in places or situations where it could be difficult or embarrassing to leave, or places where there might not be enough help if they suffer a panic attack or similar symptoms.

## Virtual Reality Environments

### Square

A great square will transport us to an open space. The amount of people in the square can be controlled to carry out gradual exposure.

### Metro

Interactive environment inside the subway which includes the access to the platform, the trip inside the train's car and the exit to the outside. The amount of people or / and problems like a breakdown can be controlled.
