

Fear of Animals

Videos, virtual and real environments to treat the most common fears of animals: pigeons, dogs, bugs and cats.

Especially useful due to its high control over the exposure adjustments.

Virtual Reality Environments

Augmented Reality

Videos

Room with spiders

Exposure to spiders inside a terrarium or walking on a table. The size of the spiders and the distance between them and the patient can be adjusted.

Room with cockroaches

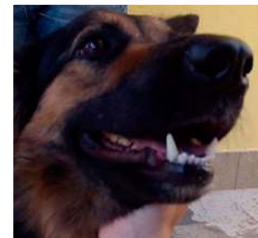

Exposure to cockroaches inside a terrarium or walking on a table. The size of the cockroaches and the distance between them and the patient can be adjusted.

Spiders

Cockroaches

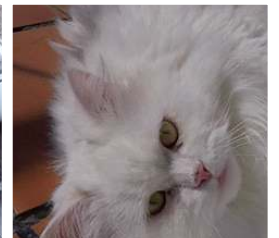

Calm dog

Rottweiler

Pigeons from a short distance

Cat
